July 2002

It is my pleasure to present the 2002 issue of the *Prince Edward Island Directory of Manufacturers and Processors*. Prince Edward Island Business Development publishes this directory to support and encourage the entrepreneurial spirit of our province's manufacturers. I hope you will find this publication to be a valuable and easy-to-use reference tool.

Prince Edward Island is well-known as a receptive environment for investors and entrepreneurs. Along with its traditional resource-based industries, the province is expanding into the development of modern technological industries. Throughout Prince Edward Island, we have a skilled labour force, numerous research and educational facilities, as well as, several business parks which offer a comprehensive range of site locations, each with a specific priority focus and a tailored range of support services.

It has never been more convenient to do business in Prince Edward Island. Export sales from the province have increased by 65 per cent in the past five years and now more than 200 companies export their products or services. Time and time again, Prince Edward Island companies prove that they can successfully compete in the global marketplace. Today, Prince Edward Island businesses distribute products and services all over the world, including, Japan, Latin America, Western Europe and North America.

Once again, I hope this directory is a useful reference tool for you and your business. Both Prince Edward Island Business Development and the individual manufacturers would welcome any inquiries you may have.

Sincerely,

Michael F. Currie
Minister of Development and Technology
